

**Chrome Floor Plate - 3" Sleeve
Model # 408-785/786**

SPALDING SPECIFICATIONS

DATE: 03-28-08

MODEL NUMBER: 408-785/408-786

DESCRIPTION: Chrome Non-Locking Volleyball Floor Plate Package
with 3" Sleeves

GENERAL DIMENSIONS: The Spalding Chrome Non-Locking volleyball floor plates are designed for use with Spalding's power volleyball systems that have 3" (76mm) o.d. uprights (all Spalding models). The 408-785 floor plate package comes with two cover plate assemblies and two floor sleeves; the 408-786 package comes with one of each. The cover plate has a polished Chrome finish and has a hinged cover that closes flush with the floor when the volleyball uprights are not in use. The Chrome plates have a heavy duty cover that resists damage under normal usage.

CONSTRUCTION:

Floor sleeves: Spalding floor sleeves are constructed of heavy duty steel tubing with a 3-1/16" (78mm) inner diameter. This allows an easy installation of the uprights with minimal movement of the uprights after installation. The floor sleeves are 7-7/8" (200mm) deep and have a baked blue powder coat finish.

Cover plate package: The cover plate outer ring shall be 7" (178mm) in diameter and 1/4" (6mm) thick, with a 4-3/8" (111mm) diameter opening for the upright to be placed in the floor sleeves. The cover shall be 4-3/4" (121mm) in diameter and 1/4" (6mm) thick and shall be hinged to the outer ring. The cover shall be seated in the outer ring so that it is flush with the floor surface when closed. The cover plate shall be attached to the floor with four #10-24 tapping screws. The cover plate and outer ring shall have a polished Chrome finish.
