MODEL NUMBER: 438-122 & 438-123

DESCRIPTION: T-Base Center Pads

GENERAL DIMENSIONS: T-Base Center Pads are designed for use with the Spalding model 438-319 T-Base Center used with multiple court installations of T-Base volleyball systems. The pads protect the players from collisions with the surfaces of the bases and conform to the shape of the base.

CONSTRUCTION: The T-Base center pads consist of four pads that Velcro to each other to pad the T-base center. A pad set consists of two end pads and two side pads.

Foam filler: The end pads shall be trapezoid-shaped foam pads that are 1-3/8" (35mm) thick. They shall be 18" (457mm) high, 24" (610mm) wide on the bottom and 7" (178mm) wide on the top. The side pads shall be 1-3/8" (35mm) thick trapezoid-shaped foam pads that are 15" (381mm) high, 39" (991mm) wide on the bottom and 13" (330mm) wide on the top. The foam shall be cross-linked polyethylene with a density of 2.0 lb/ft³ (32kg/m³) and tensile strength of 34.7 psi (0.24N/mm²).

Vinyl cover: The cover material of the pads shall be a vinyl laminated polyester fabric with a 10 x 10 scrim and a finish weight of 14 oz. per square yard. The fabric contains anti-fungal and antibacterial agents and is easily cleaned using mild soap and water. The fabric must show 100% kill in the cidal test. The cover fabric meets the National Fire Protection Standard 701. All seams are stitched with nylon thread for durability. The thread used is a monocord N-200 UVR that has 16 strands of fused 80 denier nylon.

Shipping weight: 28 lbs.
