

SPALDING SPECIFICATIONS

DATE: 10/04/2012

MODEL NUMBER: 438280

DESCRIPTION: Spalding Portable Volleyball Winch Upright

SPECIFICATIONS: Spalding Portable Volleyball Winch Upright is designed to be used with Spalding Portable Volleyball Units and is compatible only with this system. The upright can be adjusted for the regulation net heights for men, women or juniors, or any height in between. It is comprised of base and slide with the winch mounted in a fixed position. A "D" ring has been sewn into the winch strap so that the snap hook can be attached and the strap lightly tensioned for storage.

MODEL NUMBER: 438280

DESCRIPTION: Spalding Portable Volleyball Winch Upright

The base of the upright is made of 3" OD x 5/32" wall high quality steel tubing. It is 41-11/16" long and has bright chrome finish for durability. The upright base incorporates a printed label that indicates the proper height setting for the uprights. The marks on the label are calibrated to bring a correctly tensioned net to regulation height. The base also has a cutout that aligns with the through bolt in the Portable Volleyball Units' mounting tube and ensures proper alignment of the upright.

Main body of the slide is made of 3-1/4" OD x 13 gauge wall high quality steel tubing. It is 56-29/32" overall long and has durable baked powder coat finish. A worm gear winch is mounted in a fixed position to the slide and is used for tensioning the net. A spin lock assembly is used for height adjustment. There is a half-ring welded near the bottom of the slide for easy attachment of the net's bottom cord.

Spalding Portable Volleyball Winch Upright is packaged in 6" x 10" x 60" box and weighs 40 lb.
