

**Locking Brass Floor Plate - 3" Sleeve
Model # 408-725/726**

SPALDING SPECIFICATIONS

DATE: 02-05-08

MODEL NUMBER: 408-725/408-726

DESCRIPTION: Brass Locking Volleyball Floor Plate Package
with 3" Sleeves

GENERAL DIMENSIONS: The Spalding Brass Locking volleyball floor plates are designed for use with Spalding's power volleyball systems that have 3" have 3" (76mm) o.d. uprights (all Spalding models). The 408-725 floor plate package comes with two cover plate assemblies and two floor sleeves; the 408-726 package comes with one of each. The cover plate has a polished Brass finish and has a hinged cover that closes and locks to flush with the floor when the volleyball uprights are not in use. The Brass plates have a heavy duty cover that resists damage under normal usage.

CONSTRUCTION:

Floor sleeves: Spalding floor sleeves are constructed of heavy duty steel tubing with a 3-1/16" (78mm) inner diameter. This allows an easy installation of the uprights with minimal movement of the uprights after installation. The floor sleeves are 7-7/8" (200mm) deep and have a baked blue powder coat finish.

Cover plate package: The cover plate outer ring shall be 7" (178mm) in diameter and 1/4" (6mm) thick, with a 4-3/8" (111mm) diameter opening for the upright to be placed in the floor sleeves. The cover shall be 4-3/4" (121mm) in diameter and 1/4" (6mm) thick and shall be hinged to the outer ring. The cover shall be seated in the outer ring so that it is flush with the floor surface when closed and can be locked using a flathead screwdriver or coin. The cover plate shall be attached to the floor with four #10-24 tapping screws. The cover plate and outer ring shall have a polished Brass finish.
