**Volleyball Equipment Carrier
Model # 438-057**

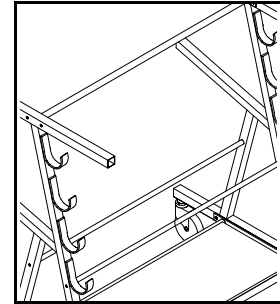

SPALDING SPECIFICATIONS

DATE: 01/01/06

MODEL NUMBER: 438057

DESCRIPTION: Volleyball Equipment Carrier

GENERAL DIMENSIONS: The Spalding Volleyball Equipment Carrier can transport and store 6 volleyball uprights, a referee platform, volleyballs, and nets. It is 4' 6" high, 2' 8" wide, and 4' 0" long (1372mm x 813mm x 1219mm).

CONSTRUCTION: The equipment carrier is constructed of steel sections that are bolted together. It consists of two end frames, a base platform and two cross tubes through the center for ball storage. There is a cross brace on the top for stability. The end frame sections are manufactured from 1-1/2" (38mm) square steel tubing. Each end shall have six pole catches on one side for volleyball upright storage and shall have a storage tube projecting from the other side to hang nets or other accessories from. The top section of the end frame shall be used for storage of the referee platform. The two center cross tubes shall be manufactured from 3/4" (19mm) O.D cylindrical steel tubing. They shall be spaced so that a regulation volleyball will sit between the two cross tubes. There shall be a wood platform set inside a steel platform weldment on the bottom of the equipment carrier. The platform shall be constructed of 1/2" (13mm) thick Structurewood™. The platform shall roll on four (4) 5" (127mm) heavy-duty casters. The steel components of the platform shall be finished with a baked navy powder coat.
