

SPALDING®

**Badminton System
Model # 438-140**

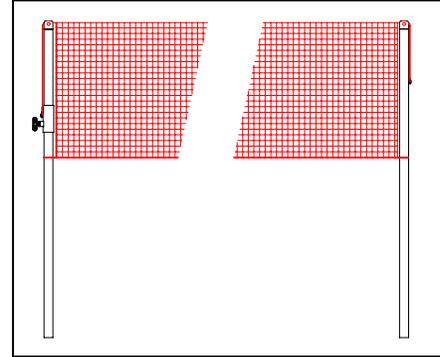

SPALDING SPECIFICATIONS

DATE: 01/01/06

MODEL NUMBER: 438-140

DESCRIPTION: Badminton System

GENERAL DIMENSIONS: The Spalding Badminton System is designed to be an economical multi-sport recreational system. Floor sleeve installation increases stability and reduces the profile of the upright. Slide collars on the Badminton system allow net tension to be adjusted.

CONSTRUCTION:

Uprights: Each upright shall be constructed of 2" (50mm) O.D. by 5/32" (4mm) wall cylindrical steel tubing. Each upright shall have a machined ear welded in the top of the pole to allow the net rope to run through. In addition there shall be holes drilled for securing the adjusting collars in place. Each upright shall be finished with a baked navy powder coat.

Floor sleeves: Spalding Badminton floor sleeves are constructed of heavy duty steel tubing with a 2-1/16" (52mm) inner diameter. This allows an easy installation of the uprights with minimal movement of the uprights after installation. The floor sleeves are 9-3/32" (231mm) deep and have a baked blue powder coat finish. They are supplied with a chromed cover plate assembly that swivels to allow access to the sleeve.

Net Tension Adjustment: The net on the badminton system shall be tensioned using a slide collar. The net rope is tied off to a rope hook on one end that runs up through a machined ear. The rope is tied off to a rope hook on a slide collar on the other end. The collar can then slide down the upright to increase the net tension.

Net: The net shall have 20' (6.1m) of square mesh. The mesh shall be constructed of size #15 nylon. The net height shall be 30" \pm 1" (762mm \pm 25mm) from top of top binding to bottom of bottom binding. It shall have white Herculite binding on the top, and brown polypropylene webbing on the sides and the bottom. The top rope shall be 26' (7.9m) long and shall be constructed of twisted polyester rope. There shall be two nylon tie strings at the bottom of the net.
